I'm a front-end developer with a passion for high quality code. What I enjoy is finding the balance between clean and reusable code, with a focus on pixel perfection and high performance. It drives me to solve hard looking problems in a simplistic, understandable and maintainable way.

WORK EXPERIENCE

Freelance - Zwijsen

Feb. 2022 - Mar. 2023

Front-end Developer

At Zwijsen, one of the biggest publishers for elementary schools in the Netherlands, I was responsible for two front-end applications; A dashboard for teachers and a teaching assistant.

My role was to lead the front-end development on these products, hire new front-end developers to increase the development speed, work out the designs and work out the requested functionality.

During this process we eventually split up into two teams to have more focus, which meant I only worked on the dashboard for the last couple of months. The focus during this project was on a tight deadline, maintainability and budget.

Technologies used: React, Typescript, Redux, Redux Toolkit, Jest, React Testing Library

Freelance - Meditation Moments

Aug. 2021 - Jan. 2022

Front-end Developer

Meditation Moments is a company focussed on helping people experience their daily moment of peace. By creating a web-app for them I helped them reach a bigger audience. The key focus was pixel perfection in combination with performance and understandable code.

Technologies used: NextJS, React, Redux, TypeScript

SKILLS

React

JavaScript

Redux

Redux saga's

Jest

CSS (SASS)

HTML

NextJS

webpack

Vue

Apollo

React testing library

Apollo-server

GraphQL

StencilJS

TypeScript

Freelance - NOS

Mar. 2021 - Aug. 2021

Front-end Developer

At the NOS I helped with the implementation of the Tokyo 2020 Olympic Games website. The focus was on a strict deadline in combination with code quality.

Technologies used: NextJS, React, styled-components, enzyme, jest

Freelance - Trifork

Dec. 2020 - Mar. 2021

Front-end Developer

Trifork is a global development agency where I helped with two projects; Allyourz and de Fietsersbond.

Allyourz

E-commerce Web application with CMS

Responsible for setting up and integrating a CMS in a headless setup. The focus was on content flexibility in combination with a strict deadline.

Technologies used: NextJS, React, Apollo, Apollo-server, Contentful, TypeScript

Fietsersbond

Mobile application for bike navigation made with React

Responsible for the setup and implementation of the functional layer in the app. The main focus was on getting the navigation working correctly and having the multiple options for all the routes.

Technologies used: Expo, React, Redux, TypeScript

Freelance - SKIM Group

Oct. 2020 - Dec. 2020

Front-end Developer

SKIM Group is a global insights agency that I helped by creating multiple reusable components used by 200+ analysts.

Technologies used: StencilJS, TypeScript, StoryBook, Ionic, NodeJS

TouchTribe

Sep. 2017 - Oct. 2020

Front-end Developer

TouchTribe is a front-end development agency where I worked on multiple different projects with different setups and integrations.

Highlights of my projects

Campercontact

Multiplatform web+mobile application made with React

Responsible for setting up and integrating a CMS in a headless setup. Key focus was scalability in combination with budget.

Technologies used: NextJS, React, Redux, Prismic

Ohra - ZZP

Web application

Responsible for the account and order-funnel integration in a traditional CMS. The focus was on pixel-perfection and performance.

Technologies used: React, Redux, Drupal

Huishoudbeurs (and other RAI event-apps)

White-label mobile application

Responsible for the implementation of a white-label app, used at multiple events. The focus was on reusability and easy configuration.

Technologies used: React-native, Redux

Liberta

Apr. 2016 - Sep. 2017

Front-end Developer

Liberta is a design company where I worked on integrating a hosting platform.

EDUCATION

Hogeschool Arnhem Nijmegen

2011 - 2016

Bachelor of Applied Science Informatica
